Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-9 rejected under 35 U.S.C. 103(a) as being unpatentable over Hu et al., U.S. Patent Number 5,942,340.

Hu discloses an organic electroluminescent device that comprises an anode, a cathode and an organic electroluminescent element sandwiched in between the anode and the cathode (see column 2, line 67-column 3, line 5). Additionally, the reference discloses that the device that comprises at least one layer containing an indolocarbazole hole transport layer. The reference discloses an indolocarbazole with a structure such as

Art Unit: 1774

wherein R^3 and R^4 can be an aryl group wherein the aryl is a fused aromatic ring (which can include a naphthyl, anthryl, alkyl fluorene). The reference does not specifically disclose that the aryl group from either R^3 or R^4 is present in an amount between 0.01 and 0.99 in comparison to

the amount of  (1-n) to which R^3 and R^4 are bonded. A prima facie case of obviousness is made when chemical compounds have very close structural similarities and utilities. An obviousness rejection based on similarity in chemical structure and function entails the motivation of one skilled in the art to make a claimed compound, in the expectation that compounds similar in structure will have similar properties *in re Payne*, 606, F.2d 202, 313, 203 USPQ 245, 254 (CCPA 1979). Therefore, it would have been obvious to one of ordinary skill in the art that the Hu reference would have an indolocarbazole structure

since it has a similar structure and properties to the indolocarbazole structure of the Hu reference.
